

# IE External Heater

Tuesday, February 8, 2022 11:20 PM

Information on how to setup Immersive Engineering Heaters:

Example of the build area:

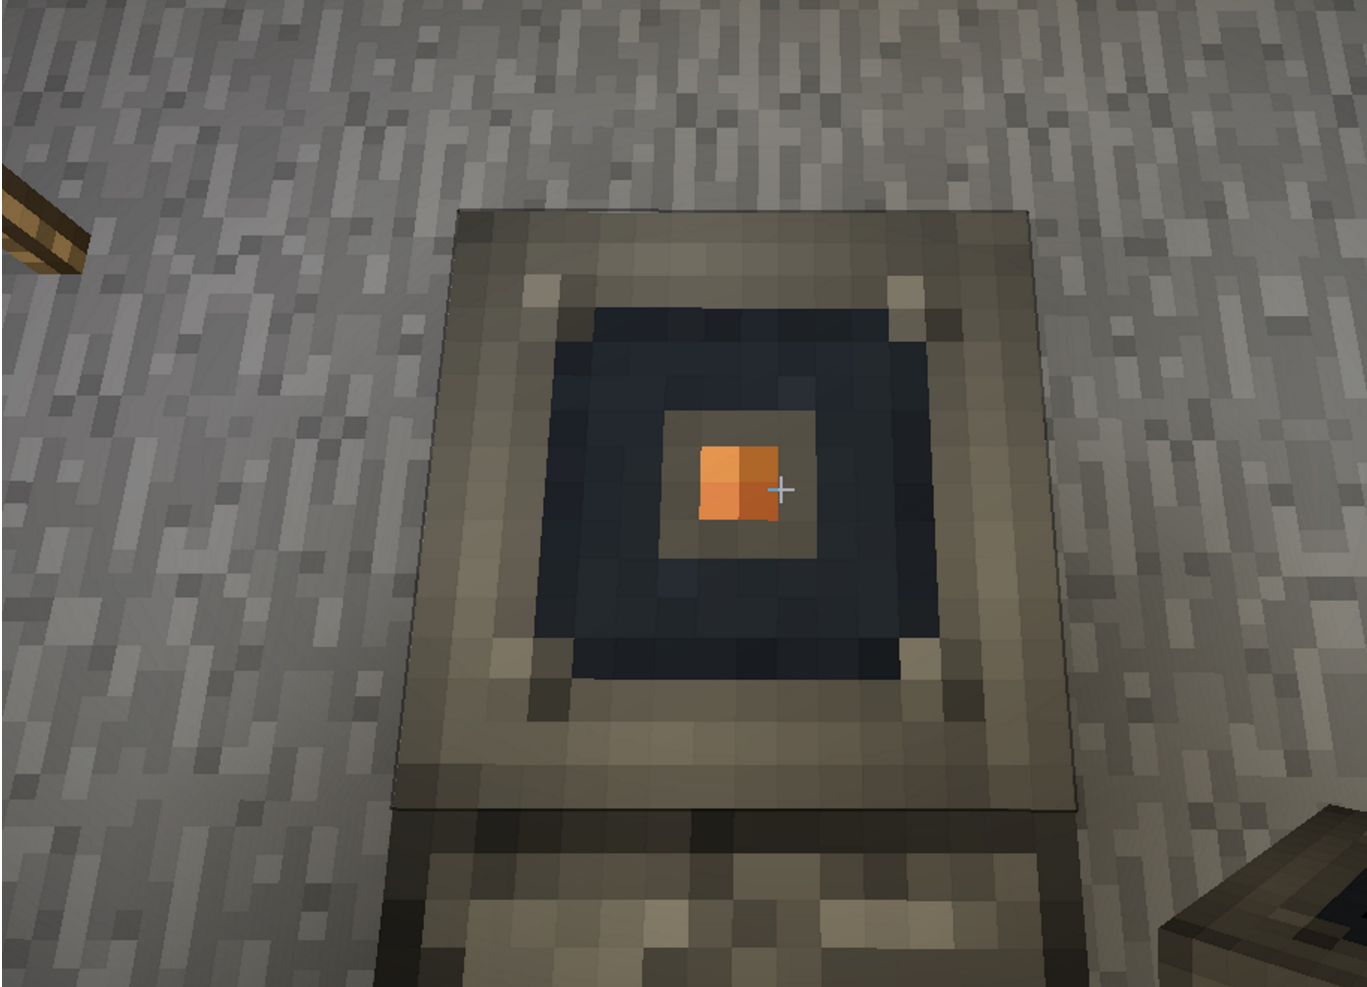

Place vanilla furnace down:

Looking down, place the immersive engineering heater:

Ensure that the orange square is on the top - if you don't see it on the top, CTRL+SHIFT with the IE hammer:

Connect/Place a wire connector to the top:

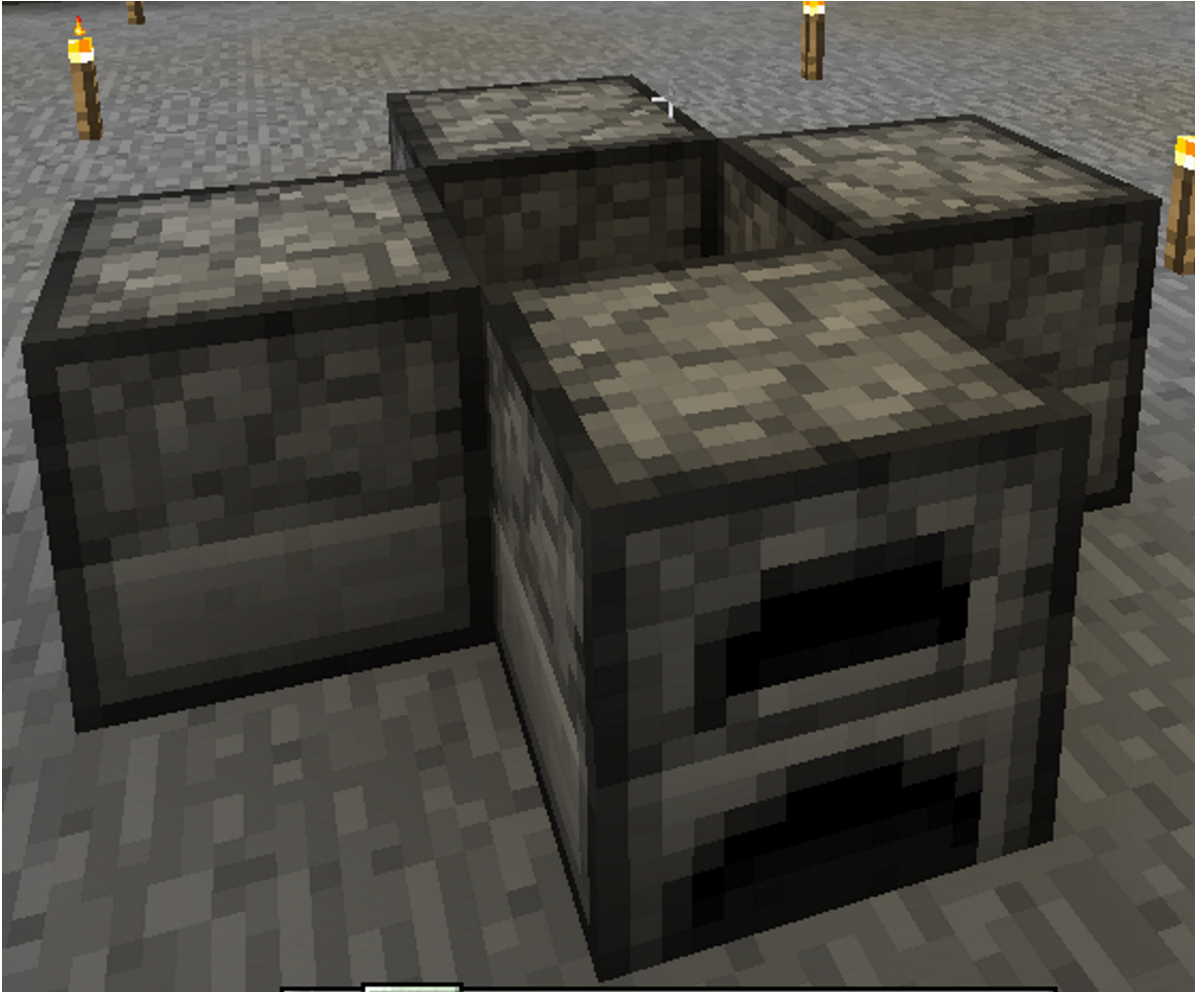

Using the same wire type as your connector, connect it to your relay:

Place ores in furnace:

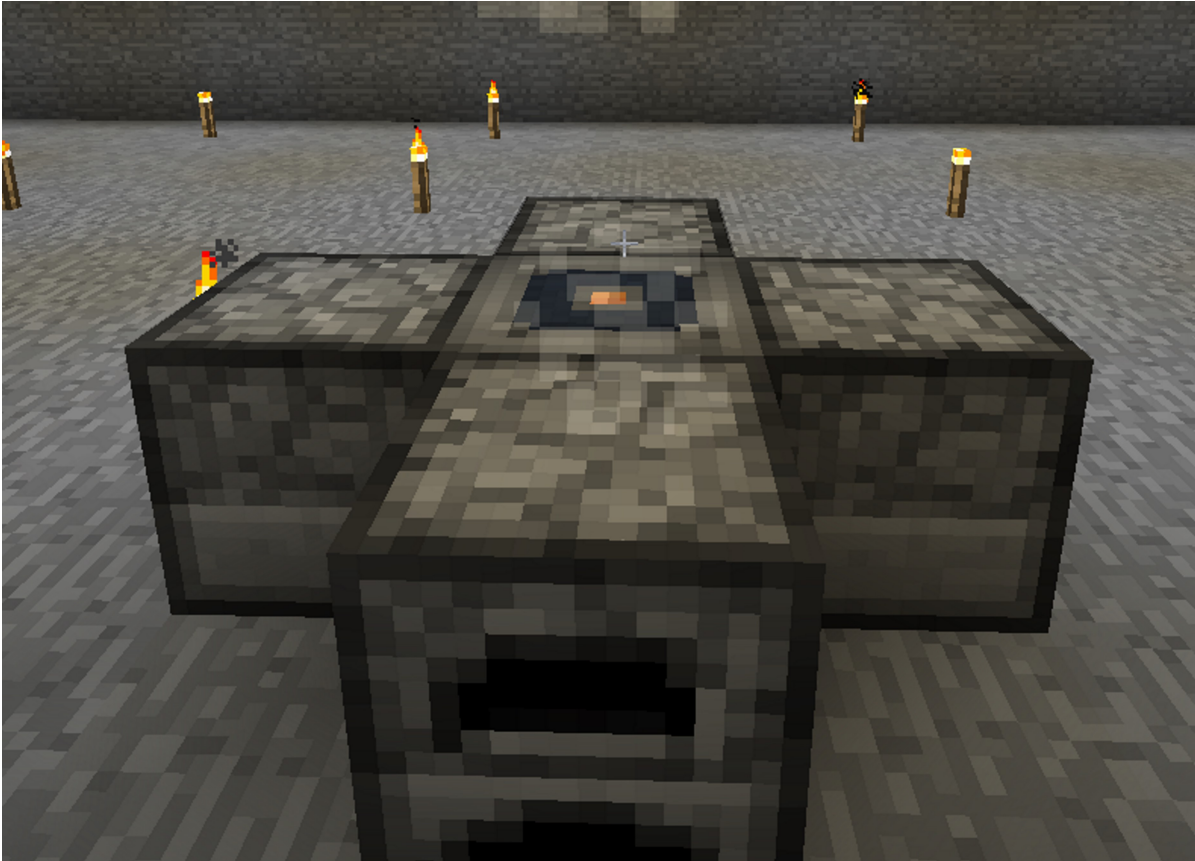

\*\*\* NOTE \*\*\* If you want four (4) furnaces to work with the IE External Heater, place your furnaces down first:

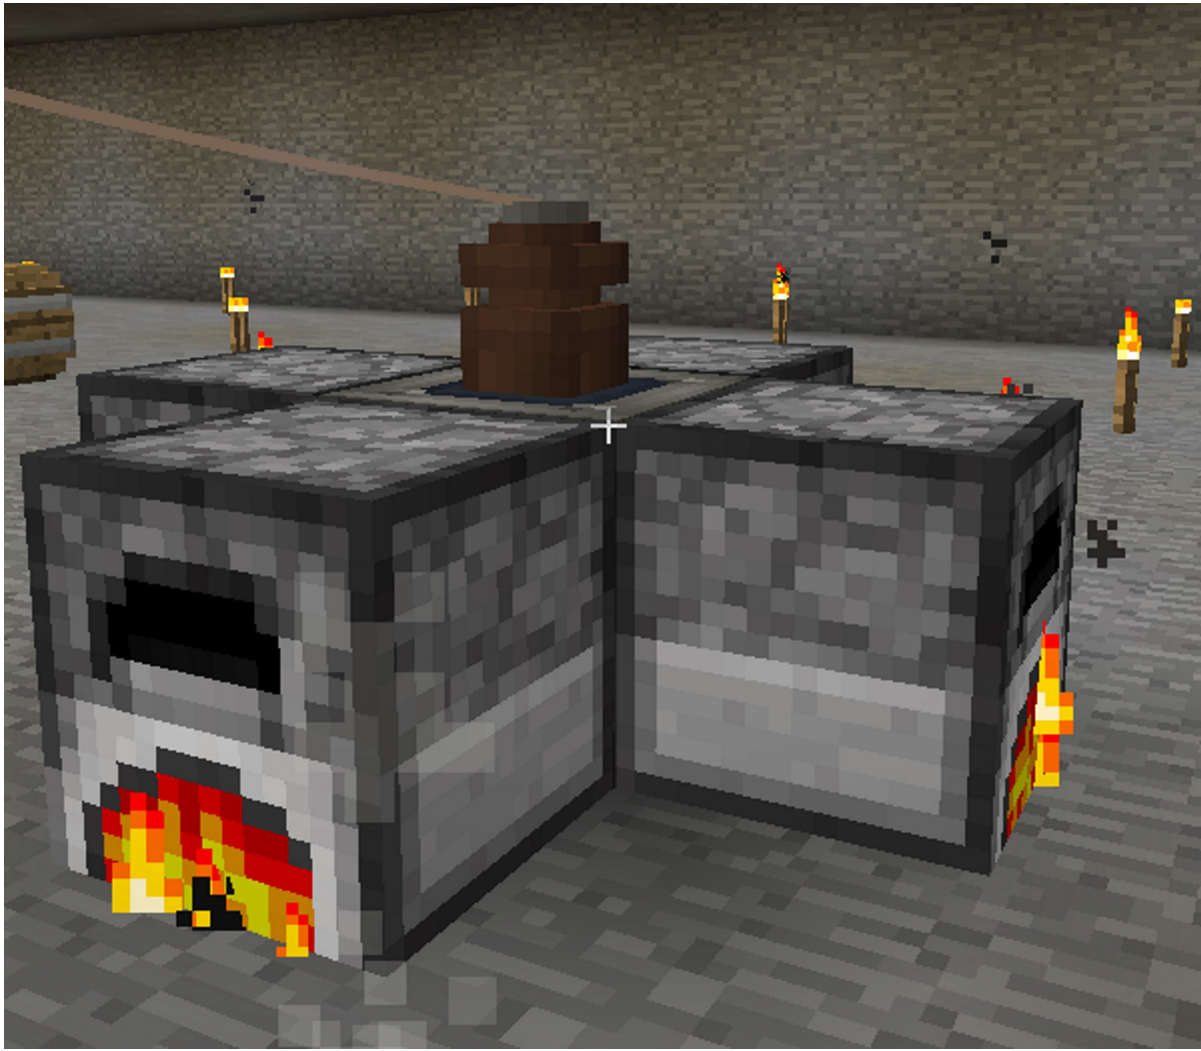

Place your IE External Heater (similar instruction as above - orange square on top):

With the wire connector connected to a relay, you can see that all four furnaces are working:
